New in This Release

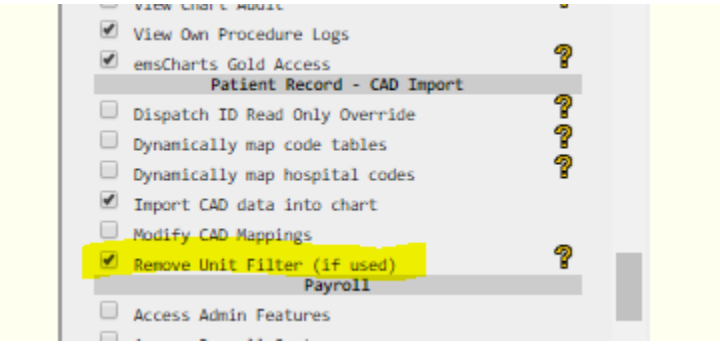
New Feature Highlights

The following new features are the most impactful for users, so we describe them here in greater detail:

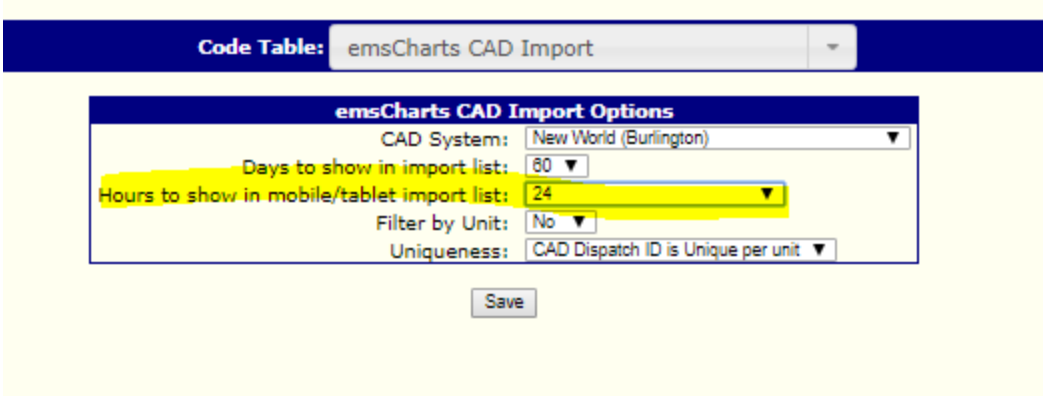
Change of Security Access for Crews to Review CAD Import Data

A security privilege has been added (Code Tables > Security Roles) in the group: **Patient Record – CAD Import** which adds the privilege to all roles that contain the CAD Import privilege. Therefore, it has been added as default-selected so that functionality for users does not change without action.

With this privilege, the user will see a link in the CAD Import screen to remove the Unit Filter (filtering by unit is an optional feature in the CAD Import Setup code table). At this time, if the service software administrator does nothing, the system will function as it did before the update.



However, if the privilege is removed (box unchecked) from all roles assigned to a user, that user will no longer have the option to remove the Unit Filter from the CAD Import Screen showing all of the CAD data. This will limit the user to view only their particular unit. Admins can further control the number of hours of available data to show in the list.



New Features

The following features have been added in this release:

EMC-5844	Legacy - Add User Title to QA Filter Rules Enhancement Proposal	Added User/Clinical Titles to QA Filter rules and the Auto QA Filter Groupings.
EMC-5676	Legacy - Mobile Page 9 URL Configuration	Mobile Sign On Path option for redirecting after uploading a chart in the mobile client
EMC-5671	Chart Toolbox Additions	View CAD record and HL7 record buttons.

Improved in This Release

The following issues have been addressed and resolved in this release:

EMC-5935	P2 - HPI Max Characters Copy/Paste 4000 max characters - Legacy	Created and tested paste function to catch input, check char length, warn users, and then continue to paste to HPI text area in Page 2.
EMC-5943	Legacy - System Global Reports Cleanup	Legacy File changed: /Rpt/edit_general.cfm.
EMC-5834	Legacy Page 2 - Alcohol/Drug defaults	Fixed Page 2 defaults so that they display correctly on charts.
EMC-5814	NEMSIS v3 Export Sizing	Removed extra white space under 'Past 90 Days Exported File
EMC-4885	Legacy Fax cover page problem (Known issue)	Fixed issue with cover page not being faxed.
EMC-5955	Geocoding Hot Fix - Service Configuration Option + Ground/Air Fix - Legacy	Fixed IE bugs and added new auto completion service configuration option. Reference: TechNote https://emscharts.atlassian.net/wiki/x/YQDeK
EMC-5794	Legacy P9 - Misc Forms - V3 Custom Elements - Add "None" To Form	Added a redirect to Page 9 when clicking save when editing the "state v3 custom Elements" form
